3. HAZARDS IDENTIFICATION

Hazard Information: May cause eye and skin irritation.

Eye Contact: Causes mild eye irritation. May cause severe irritation and blurred vision at elevated temperatures, which may be slow to heal.

Inhalation: Vapors are unlikely due to physical properties. Overexposure to mist may cause irritation to upper respiratory tract.

Skin Contact: Short single exposure not likely to cause significant skin irritation. Prolonged or repeated exposure may cause skin irritation.

Ingestion: Single dose oral toxicity is believed to be low; swallowing larger amounts may cause injury.

Aggravated Conditions: None known.

ACUTE OVEREXPOSURE: Possible eye, skin and respiratory tract irritation.

4. FIRST AID MEASURES

Inhalation: If inhaled, remove to fresh air if effects occur.

Skin Contact: In case of contact, immediately flush skin with plenty of water for at least 15 minutes. Should any irritation persist, get medical attention.

Eye Contact: Remove contact lenses. Immediately flush with plenty of water for at least 15 minutes, holding eyelids apart to ensure flushing of the entire surface. Washing within one minute is essential to achieve maximum effectiveness. Contact medical personal.

Ingestion: Do not induce vomiting. If vomiting should occur spontaneously, keep the airway clear. Get medical attention. Never give anything by mouth to an unconscious person.

Notes To Physician: None Specific. Treatment should be based on the judgment of the physician in response to the reactions of the patient.

5. FIRE FIGHTING MEASURES

Flash Point (°F/°C) Not Applicable

Flash Point Method: PMCC

Auto ignition Temp. (°F): Not Applicable

Flammable Limits in Air - Lower (%): Not Applicable

Flammable Limits in Air - Upper (%): Not Applicable

Extinguishing Media: Non-combustible.

Fire Fighting Procedures: Keep unnecessary people away; isolate hazard area.

Special Exposure Hazards: Calcium Nitrite was tested according ti UN 34.42 and determined not to be an oxidizer.

Special Protective Equipment: Fire fighters should wear full protective clothing, including self-contained breathing equipment.

6. ACCIDENTAL RELEASE MEASURES

Procedure for Cleaning/Absorption: Stop leaks. Clean up spill immediately. Clean up large spills with vacuum truck. Soak up small spills with absorbent material. Spills of solution are extremely slippery so all residue must be removed promptly. Wear adequate personal protective clothing and equipment (Section 8).

7. HANDLING AND STORAGE

PRECAUTIONARY STATEMENTS:

Handling:

CAUTION!

May cause irritation.

Avoid contact with eyes, skin and clothing.

Avoid breathing mist or spray.

Wear chemical splash goggles, gloves and protective clothing when handling.

Use with adequate ventilation and employ respiratory protection where mist or

spray may be generated.

Wash thoroughly after handling.

For industrial use only.

Storage:

Do not dry this material.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls:

Local exhaust ventilation as necessary to maintain exposures to within applicable limits. Please refer to the ACGIH document, "Industrial Ventilation, A Manual of Recommended Practices", most recent edition, for details.

Respiratory Protection:

When exposures exceed the PEL or TLV, use NIOSH/MSHA approved respirator in accordance with OSHA Respiratory Protection Requirements under 29 CFR 1910.134.

Gloves:

Appropriate chemical resistant gloves should be worn.

Skin Protection:

Normal work coveralls.

Eye Protection:

Chemical goggles or a face shield if splashing hazard exists.

Other Personal Protection Data:

Eyewash fountains and safety showers should be easily accessible.
