

ConTec TS-946

DESCRIPTION

ConTec TS-946 liquid admixture was formulated to enhance the overall integrity of concrete masonry products while minimizing production cost. When used properly this unique admixture chemically reacts with cement and its water repellent components form a permanent bond within the concrete. This provides higher cement efficiency, more vibrant color, enhanced efflorescence control, and freeze-thaw durability.

APPLICATION

ConTec TS-946 can be used in a wide variety of high- density concrete masonry products such as pavers, SRWs, slabs, curbing products, and ornamental cast stone. It is particularly useful where conventional efflorescence control agents have not performed adequately.

ADDITION RATES

The typical dosage range for **ConTec TS-946** is 1-4 oz/cwt. Consult your ICT technical representative for recommendations and guidelines for your application

FEATURES / BENEFITS

- Increases cement efficiency
- Improves product consistency
- Greatly reduces efflorescence
- Significantly reduces absorption
- Enhances freeze-thaw durability

HANDLING / STORAGE

ConTec TS-946 must be stored at moderate temperatures and away from direct sun. Never allow to freeze. When stored properly, **ConTec TS-946** has a shelf life of 12 months. Avoid creating an aerosol or mist that could be inhaled.

PACKAGING

ConTec TS-946 is available in totes and drums. An ICT representative will determine the proper dispensing system for your operation.

TYPICAL PROPERTIES

Form.....	Milky White Liquid
Color / Odor.....	Slight
Density (lb./gal).....	8.6
pH.....	8 - 9
