

# ConTec WR-650

## DESCRIPTION

**ConTec WR-650** integral water-repellant and efflorescence control agent is a highly active powder additive that reduces moisture intrusion in concrete products, mortars, and other cementitious materials. **ConTec WR-650's** unique formulation chemically reacts and bonds with concrete to provide long lasting performance.

## APPLICATION

**ConTec WR-650** can be used in a wide variety of cementitious mix applications where the use of conventional water repellants is not feasible or desired. When used in both concrete block and masonry mortar **ConTec WR-650** provides permanent protection from water infiltration throughout masonry walls.

## PACKAGING

**ConTec WR-650** is available in 22-pound (10kg) bags stacked 60 per pallet. An ICT representative will determine the proper dispensing system to match your operation.

## TYPICAL PROPERTIES

Form.....	Powder
Color / Odor.....	White / Slight
Bulk Density .....	400 kg/m <sup>3</sup>
% Volatile matter (NVM(1)) .....	0.0
VOCs (lbs./gallon).....	None

## FEATURES / BENEFITS

- Superior water repellency
- Improved soil release properties
- Compatible with other additives
- Improves freeze-thaw durability
- Greatly reduces efflorescence
- High activity/low addition rates

## HANDLING / STORAGE

**ConTec WR-650** must be stored in a cool, dry, well-ventilated area. When stored properly, **ConTec WR-650** has a shelf life of 6 to 12 months. Although **ConTec WR-650** is formulated as a low dust generating product, always avoid excessive dust formation when handling.

## ADDITION RATES

Please consult an ICT representative for recommendations and guidelines for your specific application.
